# Blind Equalization Identification Signal Processing

**blind equalization for modulation identification techniques** - received signal's amplitude characteristic will be changed. this is an advantage of blind modulation identification techniques. since the modulation schemes are identified by the amplitude characteristic, the blind equalizers perform to aid the blind modulation identification. on the other hand, in second proposed scheme, only one equalizer ... **blind channel identification and equalization in ofdm ...** - 96 *iee transactions on signal processing*, vol. 50, no. 1, january 2002 blind channel identification and equalization in ofdm-based multiantenna systems helmut bölskei, member, *iee*, robert w. heath, jr., student member, *iee*, and arogyaswami j. paulraj, fellow, *iee abstract—wireless systems employing multiple antennas at* **blind equalization and system identification batch ...** - blind equalization and system identification batch processing algorithms performance and applications advanced textbooks in control and signal processing preparing the books to read every day is enjoyable for many people. however, there are still many people who also don't like reading. this is a problem. **blind channel identification: subspace tracking method ...** - 2372 *iee transactions on signal processing*, vol. 49, no. 10, october 2001 blind channel identification: subspace tracking method without rank estimation xiaohua li, member, *iee*, and h. howard fan, senior member, *iee abstract—subspace (ss) methods are an effective approach for blind channel identification. however, these methods also have* **blind channel equalization - arxiv** - index terms—blind channel equalization, lms algorithm, ... referred to as system identification. so a reliable model of the system is available and the requirement is to estimate the unknown input signal. k ... signal equalization based on cma (2, 2) for channel 1. **blind source separation and blind equalization algorithms ...** - blind source separation and blind equalization algorithms for mechanical signal separation and identification peter w. tse j. y. zhang ... blind source separation and blind equalization algorithms 397 ... problem thus involves the identification of the mixing matrix  $h$  and/or separating matrix  $w$  with good tracking abilities. **blind channel identification and equalization with ...** - blind channel identification and equalization with modulation-induced cyclostationarity ... blind channel identification and equalization 1931 distributed (i.i.d.) input stream is modulated by the deter- ... 1932 *iee transactions on signal processing*, vol. 46, no. 7, july 1998 fig. 2. baseband discrete-time channel. **blind equalization and identification of nonlinear and iir ...** - 192 *iee transactions on signal processing*, vol. 48, no. 1, january 2000 blind equalization and identification of nonlinear and iir systems—a least squares approach **qr factorization based blind channel identification and ...** - 60 *iee transactions on signal processing*, vol. 48, no. 1, january 2000 qr factorization based blind channel identification and equalization with second-order statistics xiaohua li and h. (howard) fan, senior member, *iee abstract—most eigenstructure-based blind channel identification and equalization algorithms with second-order statistics ...* **adaptive solution for blind identification/equalization ...** - *iee transactions on signal processing*, vol. 50, no. 4, april 2002 923 adaptive solution for blind identification/equalization using deterministic **blind equalization using constant modulus algorithm and ...** - blind equalization is to recover the unknown input sequence to ... equalization. 1. blind signal is the unknown signal which would be identified in output signal with accommodated noise signal at receiver. ... channel equalization and identification has proven to be an **blind channel identification for emitter location's problem** - blind channel equalization presents a more realistic solution to channel equalization in these situations. this paper is dedicated to introduce how to apply the least-square approach to blind channel identification and equalization in the emitter location problem. major signals in digital communication system have a broad spectrum with a **1636 iee transactions on signal processing, vol. 47, no ...** - blind equalization techniques have proved viable alternatives. it is well established that when the receiver's matched filter ... 1638 *iee transactions on signal processing*, vol. 47, no. 6, june 1999 where is the  $n$ -dimensional identity matrix, then (1) can be expressed, for all time indices, as a **subspace based blind identification and equalization ...** - a subspace based blind identification and equalization algorithm balaji sampath, ye li and k. j. ray liu ... blind identification methods use the statistics of the transmitted ... received signal is sampled at  $j$  times the baud rate. it is easy to see **cross-spectrum based blind channel identification - signal ...** - *iee transactions on signal processing*, vol. 45, no. 12, december 1997 2977 ... the blind equalization problem. sampling the received sequence (channel output) at the ... cross-spectrum based blind channel identification 2979 a4) there are no common zeros between convolutional
